— VISITORS ALWAYS WELCOME —

We Are Specialists
in any and all types of

Hardy Perennials

For Rockeries, Cut Flower Work, Borders
Naturalizing

and all other uses to which this popular class may be put. We have endeavored to secure as wide a selection of this class as possible.

We have access to one of the finest collections of Western Natives. If you wish plants of any of these which we do not list we can supply them at reasonable prices. I take a pardonable pride in submitting the following list of plants for it is the culmination of fifteen or more years of effort.

It includes all of the standard hardy perennials adaptable to the Pacific Northwest and many more rare and beautiful new plants seldom listed as completely as they are here.

We can also furnish many of the so-called commercial varieties not listed.

How to Order:

Wherever possible it will be greatly appreciated if you will mail us your orders early. It will greatly facilitate handling orders in rush season, and will enable us to send you larger plants and more certainly will not be obliged to substitute. All orders, no matter when they are received will be given prompt and personal attention. Use our order blanks whenever possible. Keep the seed and plant items separate on the order. **GIVE YOUR FULL NAME AND COMPLETE MAILING ADDRESS.** Give the quantity and price of each item. You may order by catalog number alone if you prefer; however, it is much better to give the full name as well in order to avoid any possible errors. We strongly urge that you keep a copy of your order.

Our Guarantee:

We guarantee plants and seeds to arrive in good growing condition. Every effort has been made to give the full and correct botanical name as given by the best authorities. Of course in some items such as Sedums, Saxifrages, and Pentstemons we cannot absolutely guarantee the name as even the best authorities are in confusion. However, we do guarantee them to be true to description. Heights given are of plants when in full bloom, in ordinary good garden soil under normal conditions. We have endeavored to bring to you as complete a list of hardy Perennials and Biennials as possible. All items are perennial and hardy in this locality unless otherwise noted.

Postage:

All orders for seed alone will be sent post paid. Plant orders for \$1.00 or more will be sent postpaid in Zones 1 and 2. Zone 3 add 10%; zone 4, 15%; zone 5, 20%; zone 6 and further add 25%, to cover postage and packing expense. If in doubt as to your zone inquire of your postman.

Quantities:

We can fill any orders no matter how large or small.

All .15 items \$1.50 a dozen; not less than 12 at dozen rate.

——.20 items six for \$1.10; \$2.00 a dozen.

——.25 items six for \$1.30; \$2.50 a dozen.

——30 items six for \$1.70; \$3.00 a dozen.

——.35 items three for \$1.00; \$3.50 a dozen.

More expensive plants at the each rate only. To obtain dozen

rates, plants in each group must be the same variety. For 100 plants figure seven times the dozen rate. Write us for quotations on more than 100 plants.

C. O. D. ORDERS: We can not accept C. O. D. orders unless accompanied by 25% cash.

REMITTANCES: May be made by Postal Money Order; Personal Check; or stamps if in small amounts. If enclosing currency, for your own safety register the letter.

QUALITY: All plants are strictly Washington No. 1 grade field grown specimens, 1 or more years in age, and individually labeled. **SATISFACTION GUARANTEED.**

SUBSTITUTIONS: While we endeavor to grow sufficient quantities of each variety to meet the demand,, we can not outguess the public nor the weather. We will make no substitutions unless your permission is given. If permission is given we will send your second choice item if given; if not, we will substitute a similar variety.

COMPLAINTS: As you can depend upon our plants and seeds, you can also depend upon our integrity. We will at all times make reasonable adjustments of your claims. Your orders are executed by one who is personally interested in giving you the best obtainable. Nevertheless mistakes occasionally occur, and if you will write us as soon as the mistake is noticed we will take steps to correct it. We are always at your service to help you in any of your gardening problems.

DELIVERIES: Shipments can be made to points in Western Oregon and Washington any time from September First to June First on most items. For Eastern and Northern points shipments should be made in September or first part of October; last half of March, April, and May. We will of course ship at any other season if so requested but only at the customer's risk. Unless special delivery dates are given we will ship to you at the time best suited to your locality.

No index is included as all our items are arranged in alphabetical order. Seed items on last page.

We in conjunction with all reliable Nurserymen are endeavoring to aid National Recovery by cooperation and observance of the Horticultural Code of Ethics.

The stems which are at this time completely bare of foliage are covered completely with a mass of exceedingly fragrant beautiful bright pink blooms. The attractive foliage which comes later will be thickly dotted with bright red seeds.75 to \$5.00
DELPHINIUM. Ranunculaceae. "Perennial Larkspur."		
210. Belladonna 37"	Excellent variety for cut flowers; mostly light blue shades.20
211 Blackmore & Langdon 72"	A new English Strain. ..	.25
212. Chinese Blue 24"	Cut foliage; bright blue flowers. Very useful and dainty.25
213. Chinese Tom Thumb,	Miniature form of the above.25
214. Formosanum,	the dark blue form of Belladonna.20
VAN'S EXQUISITE GIANTS. See page 40.		

215. Wrexham 72" Large Hollyhock-flowered; assorted colors.20
216. ————— Dark Blue.25
217. ————— Pastel. Pink shades with a blue background.25
218. ————— XXX Pastel A superior strain of the above.30
DESMODIUM. Leguminosae. "Tick Treefoil."	
219. Canadense Racemes of purple flowers.35
DIANTHUS. Caryophyllaceae. "Pink."	
220. Alwoodi 18" A hybrid between Carnations and Pinks. Very fine double flowers in assorted rose shades.25
221. Alpinus 2" Handsome large flowered dwarf alpine; flowers rosy purple.25
222. Arenarius 6" Fringed flowers with very pale purple.25
223. Arvensis 6" Pale pink flowers.25
BARBATUS. "Sweet William." 24"	
224. ————— Double Blood Red.20
225. ————— ————— Black (Nigrescens)20
226. ————— ————— Pink, very showy.20
227. ————— ————— Pure white.20
228. ————— Single Copper Red.15
229. ————— ————— Turkey Red.15
230. Brevicaulis 6" Large single pinks.20
231. Caesius 6" Large single pinks.20
232. Caucausicus 12" Large single pinks.20
233. Crimson Bedder 12" Sport of the Sweet Williams. Deep red flowers.20
234. Cruentis 24" Grassy foliage; odd and attractive heads of very dark crimson.20
235. Deltoides Alba "Maiden Pink" White with a dark eye.20
236. ————— Brilliant 12" Very showy clear bright crimson.20
237. Dentosus Hybrids 12" Large flowers of various colors.20
238. Double Dwarf Erfurt 6" Sweet scented double pink blooms.20
239. Graniticus 12" Similar to Deltoides Brilliant but lighter.20
240. Latifolius Atrococcineus 12" Very dark red double. ..	.25
241. Mt. Hood 6" A delightful little dwarf pink.30
242. Neglectus 2" Beautiful species; flowers cherry red from diminutive tufts.35
243. Plumarius 12" "Plume Pinks." Assorted. "Clove Pinks"15
244. ————— Dark-eyed Beauty. Beautiful double pink with dark eye.20
245. ————— Highland Queen; a new bright crimson single.35
246. ————— Peacock, Assorted doubles.20
247. ————— Rose Queen. Double clear pink.20
248. ————— Snow Queen. Double Pure White.20

249. ——— Spring Beauty. A fine assortment.20
250. Single Scotch 8" Very good.15
251. Superbus. Fringed white with pale purple eye.20
DICTAMNUS. Rutaceae. "Gas Plant."	
252. Fraxinella Alba 30" Pure white.35
DICENTRA. Papaveraceae. "Bleeding Heart." Rich light soil. Shade.	
253. Formosa 12" A beautiful native.20
254. Spectabilis 30" The old-fashioned "Bleeding Heart." ..	.25
DIGITALIS. Scrophulariaceae. "Foxglove."	
255. Ambigua 24" Dwarf yellow perennial.20
256. Gloxiannaflora Purple 72" Large biennial.15
257. ——— Rose 72" Large biennial.15
258. Hybrida Lutzi 72" Salmon shades. Biennial.15
DIPSASCUS. Dipsascae. "Lacinated Teazel." Biennial.	
259. Lacinatus 96" Odd thistle-like heads; useful in dried bouquets.20
DORONICUM. Compositae. "Leopard's Bane." Moist soil; and some shade.	
260. Caucausicum 24" Early large golden yellow daisies.	.20
261. Clusii 18" Very early and superior dwarf form.25
DRABA. Cruciferae. Light soil. Spring.	
262. Borealis 6" Dainty tufts of foliage and white flowers.	.25
263. Olympica 6" Dense mossy tufts and golden yellow blooms.25
264. Repens 6" Very early creeper with bright yellow blooms.	.20
DRYAS. Rosaceae. Sandy lime soil.	
265. Octopetala 6" Dwarf habit; pure white blooms.25
266. Sundermani 6" Large white flowers followed by at- tractive feathery seed pods.25
ECHINACEA. Compositae. Rich loamy soil. "Purple Cone Flower"	
267. Purpurea 36" Large reddish purple daisies with prom- inent central cones.25
ECHINOPS. Compositae. "Globe Thistle."	
268. Ritro 48" Large globular heads useful in dry bouquets.	.15
ERIGERON. Compositae. "Fleabane."	
269. Aurantiacus Hybrids 12" Very bright colored daisies in various shades of orange.35
270. Mucronatus 12" Also known as Vittadenia Triloba; very pretty rose colored daisies.25
271. Speciosus Hybridus Grandiflorus 24" Numerous bright mauve daisies with yellow disks; excellent cut.20
ERINUS. Scrophulariaceae. Sandy soil.	
272. Alpinus 3" Very dwarf evergreen plant with red purple flowers.25
ERIOPHYLLUM CAESPITOSUM. See Bahia Lanata.	

ERYNGIUM. Umbelliferae. "Sea Holly.	
273. Amethystinum 24"	Spiny foliage and amethyst blue flowers.25
274. Planum	Steel blue flowers. Both varieties useful for drying.20
ERYSSIMUM. Cruciferae.	
275. Pulchellum 12"	Very showy early yellow flowers.15
EUPATORIUM. Compositae.	
276. Fraseri 24"	Feathery white flowers.20
EUPHORBIA. Euphorbaceae.	
277. Cyparissias 15"	Attractive green foliage and odd yellow flowers.15
EUVONYMOUS. Celastraceae.	
278. Radicans Argenteo Marginata	A very beautiful slow growing evergreen creeper with shiny variegated foliage. .35
FILIPENDULA. Rosaceae. "Meadow-Sweet." Often listed as As- tilbe or Spirea.	
279. Hexapetela Flora-plena 30"	Attractive fern-like foliage and large panicles of cream colored blooms with red buds.20
280. Ulmaria (Astilbe) 24"	Large plumes of pure double white.20
FUSCHIA. Onagraceae. Some protection.	
281. Riccartonii 48"	Dark purple corolla with scarlet sepals. Very beautiful and rare.50 to .75
GAILLARDIA. Compositae. "Blanket Flower." Blooms all summer.	
282. Dazzler 24"	Large red and yellow blooms.20
283. Portola Hybrids 24"	Brilliant scarlet with a copper hue; petals tipped golden yellow.20
284. Semi-Pleno	Assorted semi-doubles.20
285. Sybylla	Large vivid carmine petals tipped with a dark crimson center.20
286. Tangerine	New bright orange.20
Note: Separate varieties of Gaillardia do not come 100% true but all are very beautiful and all make beautiful cut flowers.	
GALEGA. Leguminosae. "Goat's Rue."	
287. Bicolor Hartlandi 48"	Clusters of miniature sweet peas; lilac and white. Very showy. Summer.20
GALLIUM. Rubiaceae. "Lady's Bedstraw."	
288. Aureum 6"	Golden yellow flowers; said to have been intermixed in the straw on which the Mother of Christ lay.35
GAURA. Onagraceae.	
289. Lindheimeri 36"	White flowers; buds tinged with purple; makes a very showy background.15

GENTIANA. Gentianaceae. "Gentian." Well drained loam.	
290. Calycosa, a beautiful native with one and rarely more large gentian blue flowers on four to eight inch stems; summer and fall.35
291. Farreri 6" Pale blue with a white throat; very slow grower.35
292. Sino-Ornata 4" Japanese Creeping Gentian, one of the very finest. Dark purple blooms. Fall.50
293. Sceptum A large free blooming member of this fascinating family. Sturdy 2 ft. stems are studded with closed or half-open dark blue flowers usually in groups of three and with six or more groups open at a time. Summer and Fall. Moisture and half shade.50
GERANIUM. Geranaceae.	
294. Grandiflorum 24" Masses of large bright blue blossoms; one of the best and showiest border plants.35
295. Loweii 24" A strong growing plant with rose pink flowers.20
296. Endressii 12" Bright rose, dwarf Pyrean species.25
297. Roseum 8" Showy bright pink.25
298. Sanguineum 8" Creeper with red purple blooms.25
GEUM. Rosaceae.	
299. Bulgaricum 15" Fine border plant with showy orange flowers. Spring.20
300. Ciliatum 12" Glossy dark green foliage; bright yellow flowers followed by attractive feathery seed pods. A very rare gem.35
301. Heldrichii 15" Very showy bright orange; spring.20
302. Lady Stratheden 24" Very large double golden yellow flowers borne in profusion; very attractive; spring and summer.25
303. Mrs. Bradshaw 24" Beautiful double red flowers borne gracefully on long stems. Spring and summer.25
304. Orange Prince 24" Our own hybrid between Heldrichii and Lady Stratheden; large semi-double flowers in attractive medium orange. Spring.50
305. Sibericum 12" Very vivid orange. Early spring.25
306. Urbanum 6" A rare specie with bright orange flowers.35
GLAUCIUM. Papaveraceae. "Horned Poppy." Sunny position.	
307. Burbank's Hybrids 36" Attractive glaucous foliage and myriads of showy flowers closely resembling the well known California Poppy. Assorted shades.25
308. Phoenicium 36" Orange Scarlet.25
GLOBULARIA. Selaginaceae. "Globe Daisy."	
309. Bellidifolia 4" Globular heads of pure white.20
310. Tricosantha 6" Very odd and attractive bright blue	

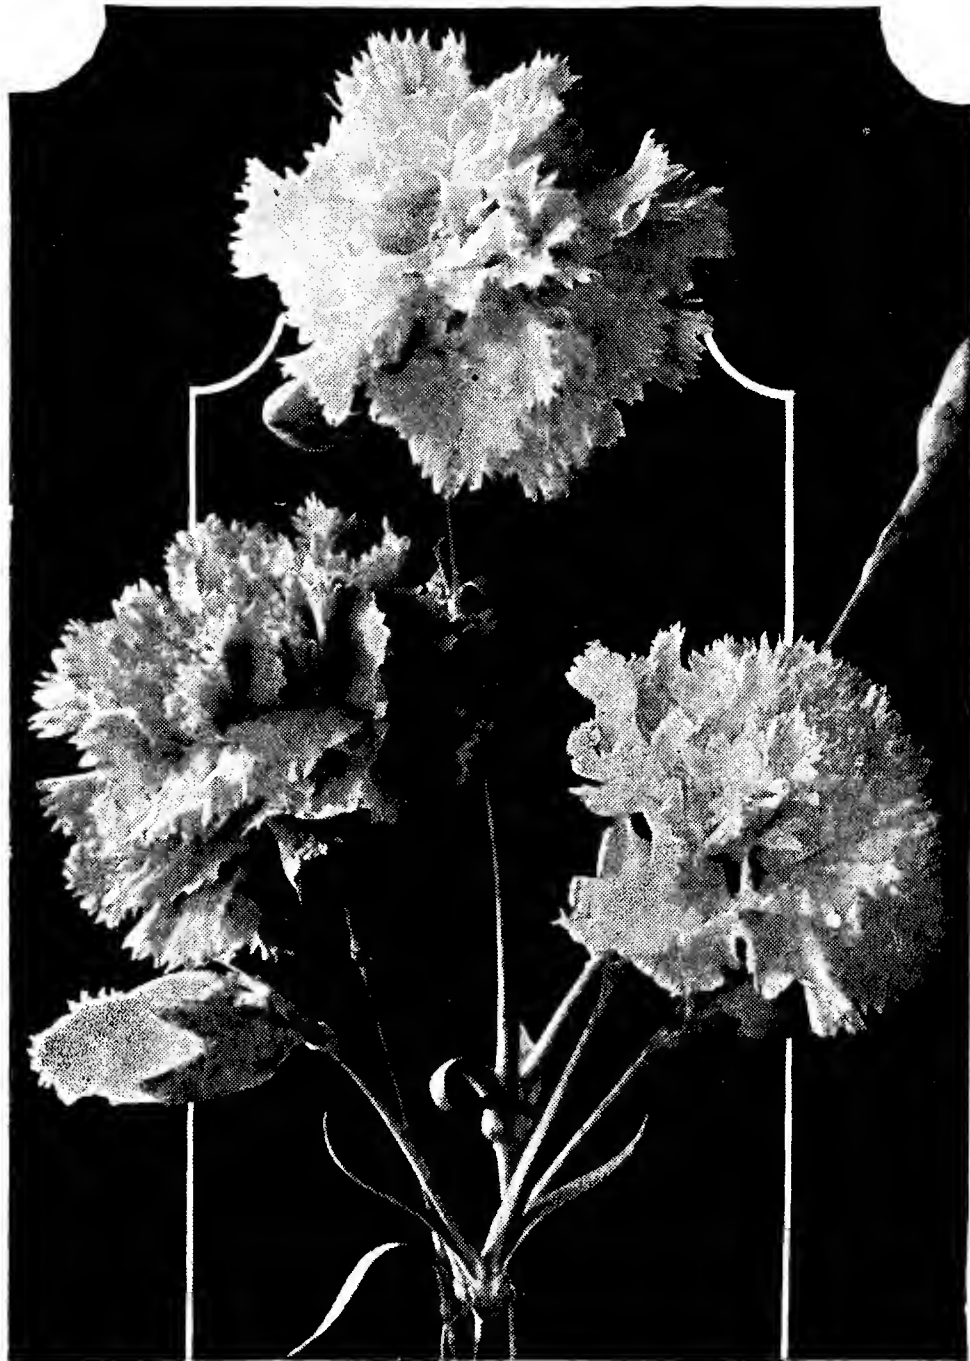

globes.25
GORMANIA. Crassulaceae. Sandy soil.	
311. Watsoni 4" Native; rosettes of large glaucous fleshy leaves and heads of soft cream flowers. A good novelty and rare.50
GOLDEN GLOW. See Rudbeckia Lacinata.	
GRASS. Ornamental. Gramineae.	
312. Bengal Grass 72" Attractive foliage stripes ACROSS the leaves.20
313. Blue Grass 72" Giant. Attractive blue foliage.20
314. Eulalia Japonica 12" A very fine dwarf ribbon grass.20
315. Festuca Glauca 6" Neat tufts of glaucous foliage. ..	.20
316. Gama-Gama, Bamboo Grass, 1 to 12 feet. Not a true grass; a beautiful background or screen plant with cream white flowers; very rapid grower.25 to \$1.00
317. Gymnotherix Japonica 42" Silvery spikes with purple anthers; similar to Pampas but hardier.50
318. Poa Pilosa 12" Filmy brown panicles.20
GYPSOPHILA. Caryophyllaceae. Lime soil. "Baby Breath."	
319. Acutifolia 36" A pretty and useful species; flowers pale pink.20
320. Manginii 36" Large flowers with a light pink.20
321. Oldhamiana 36" A rare pink form.35
322. Pacifica 36" A good clear pink.30
323. Paniculata 36" The favorite white Baby Breath for drying.20
324. ——— Flore-pleno Double form of the above.25
325. Repens Rosea 6" A fine rock plant with rose pink blooms.20
326. Stevensii, the old-fashioned Baby Breath of our Grandmothers' Gardens.20
HELENIUM. Compositae. "Helen's Flower." Bronze Fall Aster.	
327. Autumnale Hybridum Nanum Praecox 42" Early bronze and copper. Very good background plant.30
328. Riverton Gem 48" Crimson and gold in showy masses.30
329. Rubrum 72" Bright brick red.20
330. Superbum 72" Pure lemon yellow.20
These are all excellent background plant for fall blooming. Fine in combination with Fall Asters.	
331. Biglowi 24" Large golden yellow flowers with a big black disc. July.25
332. Hoopesi 24" Large daisies of bright terra cotta. June.25
HELIANTHEMUM. Cistaceae. "Rock Rose." Dry sandy soil. Bloom all summer.	
333. Mutabile 6" Assorted bright colored singles.20
334. ——— Double Orange.35

335	—————	Red.30
336.	—————	Yellow.30
337.	—————	Single E. M. Dunton, Rosy Apricot.30
338.	—————	Rose.25
339.	—————	Yellow.25
340.	Rotundifolia	double and semi-double carmine red.25
HELIANTHUS. Compositae. "Sun Flower." Fall.			
341.	Autumn Giant	96" Huge single golden yellow flowers in profusion in the late fall. A wonderful cut.20
342.	—————	Glory 36" A showy variety covered with orange yellow blooms.20
343.	Harvest Moon	60" Large flowers the color of green gold.20
344.	Multiflours	Soleil D'or 48" Large perfectly double rich yellow flowers borne in profusion. Can not be too highly recommended.25
HELIOPSIS. Compositae. Also know as Sun Flower.			
345.	Scabra Excelsa	48" Semi-double similar to Helianthus Autumn Glory.20
HEMEROCALLIS. Liliaceae. "Day Lily."			
346.	Flava	24" Lemon Lily; exceptionally showy.20
347.	Fulva	30" Large deep orange.20
348.	—————	Kwanso 30" Double orange.30
HEPATICA. Ranunculaceae. Moist soil. (Anemone Triloba.)			
349.	Triloba	4" A very fine early blue Spring gem.25
HEUCHERA. Saxifragaceae. "Coral Bells"			
350.	Brizoides	18" Fine light pink.20
351.	Sanguinea	18" Vivid coral red. Fine border plant. ..	.20
HELICHRYSUM. Compositae. "Straw Flower."			
352.	Angustifolium	24" Showy white foliage and handsome yellow flowers; a very good everlasting.25
HIBISCUS. Malvaceae. "Mallow."			
353.	Giant Yellow Sunset	36"25
354.	Mallow Marvels	48" Assortment of beautiful colors.25
HIERACIUM. Compositae.			
355.	Villosum	12" Very odd hairy gray foliage with bright yellow flowers.20
HOLLYHOCK. (Althea Rosea) Malvaceae. Rich loam. To prevent rust: Sponge the diseased parts with permanganate of potash; two tablespoonsful of saturated solution diluted with one part of water.

452. *Syphillitica* 24" Will make a rank growth in bog gardens. Flowers very bright blue.30
- LOTUS.** Leguminosae. "Baby's Slippers."
453. *Corniculata Flore-Pleno* 2" A hardy trailer covering dry banks and rock work. Bright yellow and orange blooms, all summer and autumn.25
- LUPINUS.** Leguminosae. "Lupin." Spring and fall.
454. *Arborescens*, Tree Lupin, Sunshine. 4 to 10 ft. Beautiful clear yellow.20
455. *Polyphyllus Blue* 48" Spikes of pea-shaped blooms excellent for background or cut flowers.20

456. ———	Crimson Beauty, Sutton's, a new color.50
457. ———	Luteus, delicate yellow.25
458. ———	Rose.20
459. ———	Salmoneus, assorted salmon shades.20
LYCHNIS. Caryophyllaceae.		
450. Alpina 4"	Red purple flowers; excellent rock plant. ..	.25
461. Arkwrightii,	Very showy large flowers in shades of red; it is well worth having in the yard.25
462. Chalcedonica, Maltese Cross 30"	Flowers are brick red to scarlet. An established plant makes a wonderful showing.25
462. ———	Salmon Queen, light salmon.20
463. Flos-Cuculi 20"	Ragged Robin, A very showy mass of pink ragged flowers that bloom over a long period of of time.25
Flos-Jovis, see Agrostemma Flos-Jovis.		
464. Forrestii 24"	A new showy strain of the Viscara type.	.25
465. Fulgens 24"	Large ball shaped heads of very deep red.	.25
466. Haageana Hybrids 24"	Beautiful shades of red, salmon, pink, and white. Large flowers.25
467. Viscara Splendens 24"	Rose pink flowers in early Spring.	.20
468. ——— ———	Flore-pleno. Beautiful magenta rose blooms in masses in early spring. Can not be too highly recommended for rockery or border.25
LYSIMACHIA. Primulaceae. "Loosestrife." Creeper.		
469. Nummelaria	Creeping Jenny, Very excellent for rustic vases and baskets also for carpeting the ground in shady places. A beautiful rich golden yellow flower.20
LYTHRUM. Lythraceae. "Spiked or purple Loosestrife."		
470. Salicaria Roseum Superbum 48"	Graceful spikes of purplish rose. Very showy background plant.20
MALVA. Malvaceae.		
471. Moschata 24"	Beautiful dark green cut foliage and bright pink flowers.20
MARGUERITE. Compositae.		
472. Hardy 60"	Showy masses of large pure white daisies; very useful for cutting.20
MATRICARIA. Compositae. (Mater, or Mother from its uses in diseases).		
473. Capensis	Golden Ball, Golden Feverfew 18" Masses of double golden ball shaped blooms.20
MAZUS. Scrophulariaceae. Moist soil.		
474. Rugosus,	very rapid creeper with light green foliage and lavender pink blooms.20
MENTHA. Labiatae. "Mint."		
475. Citrinodorous 36"	Lemon Mint.20

476. *Requienii* ½" A very dainty miniature creeper; flowers mauve or pale purple; foliage very strongly scented of peppermint.25
477. *Rotundifolia Variegata* 20" Round leafed mint; pink flowers.20
- MERTENSIA. Boriginaceae. Does well in either full shade or sun. It makes growth early in the Spring, and after blooming the foliage disappears.
478. *Ciliata* 24" The native Western Mertensia.20
479. *Macedonica Variegata* 24" This variety holds its handsome variegated foliage throughout the summer. Blue flowers.50
480. *Virginica*, Virginia Bluebell, Extremely early nodding blue bells with pink buds. Probably the most beautiful Spring perennial.35
- MONARDA. Labiatae. "Bee-Balm, or Bergamot." Will grow in very wet or very dry places.
481. *Didyma Cambridge Scarlet* 36" Very odd bright crimson flowers and fragrant foliage.20
482. ———— *Violacea Superba*.20
- MIMULUS. Scrophulariaceae. "Monkey Flower." Continuous bloom.
483. *Cardinalis* 18" Very attractive large flowered bright red.25
484. *Moschatus* 3" Dainty little golden yellow minature. .. .25
485. *Tigrinus* 18" Large flowered; spotted.25
- MYOSOTIS. Boriginaceae. "Forget-me-not."
486. *Paulstris Semperflorens* 6" Will grow in bogs or very dry soil. Perennial.20
- NEPETA. Labiatae. "Catmint."
487. *Mussini* 18" A delightful border or rockery plant with strong scented foliage and deep lavender blooms all summer.20
488. ———— *Grandiflora* 12" Larger leaved and larger flowered than the preceding.20
- NIEREMBERGIA. Solanaceae. "Cup Flower."
489. *Frutescens* 18" Bright flax-like flowers of vivid blue; must be protected.25
490. *Rivularis*, a rapid growing hardy creeper with large pure white cups with a yellow throat.20
- OENOTHERA. Onagracea. "Evening Primrose." All summer.
491. *Fraseri* 18" Very attractive bright golden yellow. .. .20
492. *Macrocarpa* 6" A very fine rock plant with very large lemon yellow cups.25
493. *Missouriensis*, Deeper colored form of the above.25
494. *Pusilla* 8" A very dainty miniature.25

OMPHALODES. Boriginaceae. Moist position.	
495. Cappadocica 6"	A very striking early flowered semi-trailer with dark foliage and bright blue flowers.20
OXALIS. Oxalidaceae. "Wood Sorrell."	
496. Corniculata 8"	Red purple foliage and bright yellow flowers.20
497. Trappeliodes 8"	Reddish foliage and yellow blooms. .20
PACHYSANDRA. Buxaceae. "Japanese Spurge."	
498. Terminalis 8"	An excellent evergreen ground cover for dense shade.20
PARDANTHUS. Iridaceae. "Blackberry Lily, or Leopard Flower."	
Variously known as Gemmingia Chinensis, Belamcanda Punctata, Ixia Chinensis and Moraea Chinensis.	
499. Sinensis,	one of the oldest flowers in cultivation; bright orange star shaped flowers with black spots followed by seed pods that resemble a ripe Blackberry.25
PAPAVER. Papaveraceae. "Poppy." Sunny location.	
500. Alpinus 6"	A very pretty delicate dwarf with glaucous foliage and flowers in various bright colors.25
501. Nudicaule Orange, Iceland Poppy, very fine self sowing Biennial.15
502. ————	Pearls of Dawn, new salmon shades.25
503. ————	Yellow.15
504. Orientalis,	Apricot shades.25
505. ————	Beauty of Livermere, immense blood crimson. .35
506. ————	Olympica, the only double Oriental poppy; very fine large showy bright scarlet.35
507. ————	Salmon shades.20
508. ————	Scarlet.20
PENTSTEMON. Scrophulariaceae. This American Genus is indispensable in the garden and rockery. It gives a wide variety of colors, heights, seasons of bloom. Botanists disagree on the names and habits of many of these beautiful flowers that might be classed as the backbone of Western gardens. I have many varieties that because of this uncertainty, I do not care to list. However, the lack of classification does not detract from their usefulness or beauty and I can fill a limited number of orders for almost any Western Pentstemon at regular prices.	
509. Blue Gem 15"	This is indeed a gem. It has beautiful long trumpets of bright blue with a pink caste. One of the very finest.25
510. Centranthifolius, The Scarlet Bugler 36"	Rich vermillion. .50
511. Eatonii 18"	Bright carmine red.25
512. Glaber 18"	A very beautiful hybrid strain; showy trumpets varying from beautiful pink to soft blue.20 to .50

513. Graciella Hybrida 24"	Graceful strain of mixed colors for border or cutting.30
514. Gracius 24"	A new variable strain.25
515. Grandiflorus 24"	Has lilac blue flowers two inches long; very showy.25
516. Hartwegi Southgate Gem 24"	Rich crimson scarlet flowers all summer and autumn. Very fine for border, bedding or cutting.25
517. Hirsutus 24"	Lavender purple.25
518. Menziesii 6"	A pretty species; mounds of dark evergreen foliage varying shades of pink trumpets. .25 and .50	
519. Newberryi 4"	Sub-shrubby species with very large bright carmine flowers.35 to .75
520. Pubescens 18"	Violet purple and white.20
521. Rattani Minor 4"	Dark green foliage; lavender blooms. .20	
522. Rupicola 4"	Blue-green foliage; slow growing; with large vivid scarlet blooms.35 to \$1.50
523. Pulchellus 24"	Violet and lilac with white veins; variable.25
524. Southgate Gem 18"	Large flowered brilliant red.25
525. Confertus Caeruleo-Purpureus, Shiny bright green foliage; blue flowers.25

PHLOX. Polemoniaceae.

526. Adsurgens 10"	native; dense mats of bright evergreen foliage; clusters of pink to white flowers. A rare gem for the rockery.35
527. Amoena, dwarf	green foliage and abundant beautiful pink flowers in early spring and late fall.25
528. Davuricata Canadensis 15"	A beautiful lavender phlox native to the Middle Western States; thrives in half shade or full sun.25
528. Setacea Vivid 6"	Very vivid rose pink; early creeper.35
530. Subulata Atropurpurea 6"	A very rare new form of the popular creeping Phlox; a rich deep wine red.50
531. ———	Lavender. Large flowered.20
532. ———	Rose.20
533. ———	Vivid. Very attractive bright rose pink.25
534. ———	White.20
535. Verna 8"	A fine gem with large deep pink flowers. ..	.30

PHLOX DECUSSATA. 2 to 4 ft. Midsummer.

536. Antone Mercier, a beautiful combination of lavender and white.20
537. Dr. Wagner, bright rosy scarlet.20
538. Ecoleureur, semi-dwarf early deep rose.20
539. Elizabeth Campbell beautiful clear pink.20
540. Embarrassment, striking deep rose.20

541. Gefion, light appleblossom.20
542. Gwendolyn, clear lavender rose.20
543. Joan of Arc, pure white.20
544. Kaiser, rose scarlet.20
545. Lavender Gem, tall.20
546. Leah, lavender tinted rose.20
547. Le Mahdre, mauve.20
548. La Vague, pink.20
549. Millie Von Hoboken; enormous trusses of carmine pink.30
550. Madam Paul Dutre, salmon rose.20
551. Mrs. Jenkins, new pure white.30
552. New Hybrids, a very beautiful assortment of all colors.20
553. Rheinlander, large bright red.20
554. Salmon Beauty.20
555. Seibold's Scarlet, very vivid.20
556. Thor, excellent large deep pink.20
557. Pink Wonder, tall clear pink with a darker eye.20
558. White Beauty20
559. White Perfection, contrasting eye.20
PHYSALIS. Solanaceae. "Chinese Lantern."	
560. Bunyardi 36" This elegant and striking hybrid has proved a most useful decorative plant producing glowing orange lanterns in abundance. Can be dried.25
561. Franchetti 30" Deeper orange than the above. Usually get better results in producing lanterns if there is one of each.25
PHYSOSTEGIA. Labiatae. "False Dragonhead, or Obedient Flower."	
562. Virginica Alba 36" Pure white; close compact spikes.20
563. ——— Vivid 24" Very showy bright pink.30
564. ——— Compacta Nana 18" Showy bright pink. ..	.25
PHYTEUM. Campanulaceae.	
565. Scheuchzeri 12" A very neat compact specie; peculiar heads of violet blooms resembling the Jasione.50
PLATYCODON. Campanulaceae. "Chinese Bellflower."	
566. Glandiflora 24" Large bells in light or dark blue.20 and .35
567. Mariesii 12" Very attractive dwarf; bright blue.35
PLEIOSPILOS. Aizoaceae. South African Succulent. This exceedingly rare and new group of plants have recently been discovered in the deserts of extreme Southern Africa. Very curious foliage not over 4 inches high closely resembling the Shale rocks among which they are found. These little "rocks" will split open and emit a bright yellow bloom. These species will probably stand considerable frost but no rain. Makes an attractive houseplant in winter. Nature has endowed these plants with the ability to store water in the foliage. Their smooth leaves furnish the African an-	

telope with both food and drink. Stock imported from Mowbray, Cape Town, South Africa.

568. Bolusi. The most sought after of the stemless Mesembryanthemum. Growths pairs of stone-like appearance; large flowers of rich golden yellow. \$1.50
569. Fergusonii, Rough brown angular fleshy leaves which successfully disguises their position among the Shale of Similar nature. \$1.50
570. Nellii, This plant is composed of thick fleshy leaves which joined together resemble a water worn stone. Exceedingly rare. \$2.00
571. Magnipunctata, Semi-glaucous triangular thick leaves with dark dots. \$1.25
572. Roodiae. Growths shading to red during drouth; forms a compact clump. \$1.50
573. Simulans. A very rare species; very similar to Bolusi. \$1.50

PLUMBAGO. Plumbaginaceae.

574. Larpentae. A fall flowered dwarf, beautiful blue.25

POLEMONIUM. Polemonaceae. "Jacob's Ladder."

575. Carneum. A pink or salmon colored beauty; sprawling. 12" All season.25
576. Humile 6" A very pretty alpine with pale blue flowers. .20
577. Prima Donna 36" Attractive foliage; blue flowers.20
578. Reptans 12" Exceedingly showy; early vivid blue.25
579. Richardsoni 30" Large bright blue.25

POLYGONUM. Polygonaceae. A good marsh plant.

580. Vaccinifolium 15" Dense foliage; spikes of pink bloom. .20

POTENTILLA. Rosaceae. "Cinquefoil, or Flowering Strawberry." All season.

580. Alpina 3" Dark green foliage and bright yellow flowers. .25
582. Calabria 6" Grayish foliage; yellow blooms.20
583. Cinerea 4" Very dainty orange yellow.25
584. Gibsoni 12" A lovely scarlet flowered creeper.35
585. Multiflora Nana, showy easily grown plants with a mass of semi-double flowers.25
586. Nepalensis 24" Double assorted.25
587. ——— Miss Willmott, Magenta rose with a dark eye. .25
588. ——— Roxanna, brilliant salmon.20
589. Pyrenacea 12" Canary yellow; early.30
590. Tridentata, small flowered white.20
591. Verna, creeper with bright orange blooms.25

PRIMULA. Primulaceae. "Primroses." Moist soil and some shade preferred.

592. Auricula 9" Smooth glaucous foliage; dark red blooms with a contrasting eye:20
593. ——— Giant Exhibition. Very large and beautiful

	velvety blooms in many odd color combinations.	.25 to .50
594.	Acaulis, Dbl. Lavender, very showy.	.35 to .75
595.	————— White, tinted pink.	.35 to .75
596.	————— Single blue.	.35 to .75
597.	Cashmeriana Denticulata 12" Very showy globular heads from pure white to dark blue; Early.	.35 to .75
598.	Juliae, a dwarf crumpled mass of heart shaped leaves; and showy flowers of varying shades of lilac through the Spring and again in the fall. 3" Very fine and new.	.35 and .50
599.	Veris, blue (Polyanthus) Varied shadings.	.35 and .50
600.	————— Gold Laced; each petal outlined in gold.	.20
601.	————— Grandiflora, assorted truly beautiful colors.	.20 to .50
602.	————— Kleynii, distinct large orange yellow.	.35
603.	————— Red Shades.	.20
604.	————— Pink.	.20
605.	————— Yellow, very popular.	.20
606.	————— White.	.20
607.	Vulgaris, Cowslip, assorted colors.	.20
PRUNELLA. Labiatae.		
608.	Grandiflora 8" Very odd purple blooms; rapid.	.20
609.	Rubrens 6" Bright rose.	.20
PULMONARIA. Boriginaceae. "Lungwort."		
610.	Angustifolia 8" Very dark green foliage; extremely early blue flowers with pink buds.	.20 to .50
611.	Saccharata 12" Very decorative large spotted foliage, bright blue flowers.	.35 to .75
PYRETHRUM. Compositae. "Painted Daisy." Spring and Fall.		
612.	Atrosanguineum 30" Large deep blood red daisies. Excellent Cut.	.25
613.	Carneum 30" Flesh pink.	.25
614.	Double Assorted. 30" Double and semi-double in all shades.	.25
615.	James Kelway. Large dark red.	.25
616.	Roseum 30" Clear deep pink.	.25
617.	————— Assorted all shades from white to dark red.	.20
618.	Tchihatchewii 6" "The Turfing Daisy". An excellent white flowered carpeter, for graves, dry banks, etc.	.20
RUDBECKIA. Compositae. All summer.		
619.	Hirta, Black Eyed Susan 24" Large deep orange daisies with a prominent black cone borne in profusion all summer and autumn; excellent cut.	.25
620.	Laciniata 96" Single Golden Glow, Huge, masses of large golden yellow daisies with a brown cone.	.20
621.	————— Flore-pleno, the well known double Golden	

Glow.20
622. Newmani. Very similar to R. Hirta except that it is yellow instead of orange.20
623. Purpurea, Purple Cone Flower. Large rosy purple daisies with a dark cone.25
SALVIA. Labiatae. "Sage." Sunny position.	
624. Argentea 36" Large hairy white ornamental foliage; very beautiful.75
625. Azurea Grandiflora (Pitcheri) 36" Deep blue in long racemes.20
626. Dichroa 36" Spikes of deep blue flowers; one of the best species.35
627. Globosa 48" Silvery gray foliage; white flowers.50
628. Glutinosa 30" Very odd and attractive golden yellow flowers. Rare.50
629. Nemerosa Superba 24" Bright blue.25
630. Nutans 24" Very fine Spring blooming blue flowers.25
631. Officinalis Variegated 24" Attractive variegated form of the medicinal sage.20
632. Patens 24" Very attractive royal blue.25
633. Pratensis, Violet blue; free flowering.25
634. ——— Tenorei, bright blue; continuous blooming. ..	.35
635. Turkestanica, pink flowers in bracts.75
636. Verbascifolia Syria 72" Large white woolly foliage; odd blue flowers.25
SANTOLINA. Compositae. "Lavender Cotton."	
637. Chamaecyparissus 15" Bluish white foliage; and yellow blooms.25
SAPONARIA. Caryophyllaceae.	
638. Officinalis 36" Bouncing Bet. A good cut.20
SAXIFRAGE. Saxifragaceae.	
639. Aizoon 15" Neat encrusted form; white flowers.20
640. ——— Rosea, light pink flowers.20
641. Bauldensius 8" Very tiny compact encrusted rosettes.35
642. Cordifolia Megasea. Huge leathery dark green foliage; very large brilliant rose pink flowers in the very early Spring.35 to \$1.50
643. Decepiens, Giffords Seedling, a mossy Saxifrage with attractive salmon pink blooms.35
644. ——— Red 12" Very bright and showy; mounds of green.25
645. ——— Rose 8" Very attractive and early.20
646. ——— White 8" Large flowered.20
647. ——— Dwarf dark red.35
648. Elizabethae 4" A rare miniature.35
649. Lingulata Leichtlini, rare pink flowered.50

650. Longifolia Hybrids 24" Handsome large encrusted foliage; tall panicles of pure white flowers. It is very good for producing a natural effect in the rockery.20
651. Macnabiense 15" A fine white flowered miniature encrusted type.25
652. Pyramidalis 30" Very large rosettes of encrusted glaucous foliage; and huge panicles of white bloom; very good for cut flower.25
653. Umbrosa, London's Pride. Dark green rosettes; red flowers. Will grow in shade.20
- SCABIOSA. Dipsascae. "Blue Bonnet." Pin Cushion Flower."
654. Caucausica 30" Large light blue flowers; excellent for cutting.20
655. Japonica 30" Finely cut foliage; clear lavender blue flowers.20
- SEDUMS. Crassulaceae. "Stonecrop." All sedums are, except where otherwise noted, creepers. Practically all are evergreen. All are fine for rock garden work as they will withstand a great amount of drouth and neglect, and remain attractive at all times of the year.
656. Acre, Gold Moss, the commonest form of all but very pretty.20
657. ——— Variegated, this form has each shoot tipped golden yellow in the winter giving it the appearance of being in bloom.20
658. ——— Verdissima, a very dark green form of the above.20
659. Aizoon, fleshy dark green foliage; bronze yellow blooms. .20
660. Album. A rapid dark green creeper with white flowers. .20
661. Altissima, glaucous foliage; yellow blooms.20
662. Anglicum (Glaucum) Handsome dense mats of glaucous foliage; white blooms.20
663. Anacampestre. Very odd glaucous serpentine foliage. .. .20
664. Brevifolium. Very dainty minute bright green; white flowers.20
665. Crimson Hybrid. A fast growing red leaved beauty. .. .20
666. Dasyphyllum. Minute gray foliage; white flowers; a gem.20
667. ——— Corsicum. A very tiny slow growing form. .. .25
668. Divergens. Handsome red and green foliage; yellow flowers.20
669. Douglasi (Siskuensis). Rather tall sturdy dark green foliage; dark yellow blooms.20
670. Faberia. A gray leaf Japanese form.30
671. Ewersii. One of the most attractive; glaucous foliage, pink flowers.20

672. Hispanicum. Dainty glaucous foliage; white flowers. . .	.20
673. ———— Glaucum. Very tiny and compact.20
674. Hybridum. Fleshy dark green foliage; bronze flowers.	.20
675. Kamschaticum. Exceptionally showy and sturdy; deep bronze and yellow flowers.20
676. ———— Flavissima. A clear yellow form of the above.	.20
677. ———— Variegated.20
678. Lydium. Very beautiful dainty mats of scarlet and green foliage.20
679. Maximum Atropurpurea 24" A very rare tall growing purple form.30
680. Middendorffianum. Brownish yellow flowers; serrated leaves.20
681. Mesenberata. A very rare Sempervivum-like form; very slow growing.35
682. Muralis. Exceptionally fine dark red foliage; light pink flowers.20
683. Nevi. A very dainty form; slow in growth.25
684. Obtusum. Odd fast growing foliage; one of the best mats.20
685. Oppositifolia. Attractive foliage; pink flowers.20
686. Oregonianum. Very rapid bright green foliage; yellow blooms; native.20
687. Prunatum Forsterianum. Handsome glaucous foliage.	.20
688. Reflexum. Blue gray foliage; yellow flowers.20
689. ———— Bronze Beauty. Bronzy foliage.20
690. ———— Cristata. Odd dark green foliage with peculiar cockscomb-like crests.20
691. ———— Cristaballa. A smaller form of the above. . .	.20
692. ———— Gray Beauty.20
693. ———— Reptans. Very dainty.20
694. ———— Roseum. Pink caste to the foliage.20
695. Rupestris. Very similar to Prunatum Forsterianum. . .	.20
696. Sarmentosum. Very rapid grower yellowish green foliage.20
697. Seiboldi. A very attractive Japanese specie; slow in growth. Foliage turns red in fall; pink flowers. .20 to .50	
698. Sexangulare. Mats of dark green; yellow blooms.20
699. Spathulifolium. Very handsome gray foliage with a me- tallic red luster. One of the very finest.25
700. ———— Glaucum. A plain gray form.25
701. Spectabile 18" Large heads of bright pink bloom, a husky grower. Fall blooming.20
702. ———— Brilliant. The deep red form of the above.	.20
703. ———— Variegated; striped foliage; light pink blooms.	.25
704. Spurium. Dark foliage; light pink blooms.20

705. ——— Coccineum. Dark pink blooms20
706. Stoloniferum. Dark foliage; fleshy pink blooms.20
707. ——— Harbinger. Blooms early in the Spring; white flowers.20
708. Triste. Dark green foliage; yellow bloom.20
709. Veris Albus. A dainty white flowered form. "Hen and Chickens."20
SEMPERVIVUM. Crassulacae. "Houseleek." Any soil.	
710. Androsaciodes. An attractive variety with hairy dark green rosettes.25
711. Arachnoideum Fimbriatum. Tiny cobwebbed rosettes; flowers pale purple.25
712. ——— Laggeri. A larger form of the above.25
713. Brauni. Large attractive light green rosettes.25
714. Browni. Chocolate brown rosettes. Very attractive in winter.25
715. Montanum. Tiny closely crowded rosettes of bright green; pink flowers.25
716. Monstrosum. Green rosettes with a purple tip.25
717. Tectorum, Hen and Chickens. Large rosettes and odd pink flowers.20
718. ——— Hybridum. Very attractive rosettes tinted with red, violet, chocolate.25 and .35
719. Vulgaricum 15" Dark red flowers.20
SHAMROCK. (Trifolium Atropurpureum) Leguminosae.	
720. Communis. Red purple foliage.18
SHASTA DAISY. (Chrysanthemum Leucanthemum) Compositae.	
All summer.	
721. Fluffy Ruffles 24" Magnificent pure white fully double blooms. Excellent cut flowers.50
722. May Queen 24" A very early Shasta.20
723. Laciniatum. Large flowered, curled petals.25
724. Mrs. C. L Bell 48" Very large pure white.20
725. White Lady. A very early double.25
SIDALCEA. Malvaceae. "Baby Hollyhock."	
726. New Hybrids 36" Very fine pink shades.25
727. Rose Queen 36".25
SIEVERSIA.	
728. Ciliata. Odd reddish nodding flowers on 10 inch stems; fall.35
SILENE. Caryophyllaceae. Sandy loam.	
729. Acaulis, Moss Champion. Light green mossy foliage; stemless pink flowers.20
730. Alpestre 8" Very fine pure white.20
731. Armeria. White to dark pink 24" All season. A free growing beautiful cut flower.20

732. *Asterias Grandiflora* 18" Large globular crimson scarlet heads.25
733. *Maritima* 4" Glaucous foliage, odd showy white blooms. .25
734. *Orientalis* 18" Fragrant deep rose; biennial.15
735. *Schafta* 6" Rosy purple; trailing habit.25
- SISYRINCHIUM.** Iridaceae.
736. *Anceps* 12" Deep blue with a dark eye; very showy. Grassy foliage.25 to .75
737. *Bellum*. Pink to royal purple flowers daintily carried on graceful grass like 10 inch stems. Spring and summer. .35
738. *Californicum* 8" Bright golden yellow flowers on grass-like stems blooming over a long period of time.35
739. *Iridifolium* 12" Flowers buff and violet, in spike formation.50
740. *Striatum*. Glossy bright yellow flowers striped with deeper yellow toward the center. A very rare treasure from the Argentine.35
- SOLDENELLA.** Primulaceae. "Foam Flower."
741. *Alpina* 3" Elegant dwarf alpine; drooping pale blue flowers.35
- STACHYS.** Labiatae. "Kitten's Ears."
742. *Lanata* 12" Odd woolly white foliage for edgings. .. .20
- STATICE.** Plumbaginaceae. "Sea Lavender." All Statice make fine dried flowers used like Baby Breath.
743. *Asiaticus* 8" Exceedingly rare and beautiful dwarf; light pink flowers.75
744. *Dumosa* 15" Large silvery white sprays.25
745. *Latifolius* 24" Lavender. Very fine.25
746. *Perezzi* 24" White; fine for dyeing.25
747. *Tartarica* 18" White; fine for dyeing.25
- STELLARIA.** Caryophyllaceae. "Easter Bell."
748. *Graminea* 6" Grassy foliage; pale yellow blooms; excellent for sandy banks.25
- STOKESIA.** Compositae. "Stoke's Aster."
749. *Cyanea*. Resembles very much the Sunshine Aster. Very pretty light blue.25
- SWEET WILLIAM.** See *Dianthus Barbatus*.
- SYNTHESIS.** Scrophulariaceae. Shady position. "Alpine Violet."
750. *Reniformis* 6" Beautiful early flowering bright blue. .25
751. *Rotundifolius*, Spring Queen 4" Light to dark blue flowers.25
752. *Stellulata* 6" Glossy foliage; blue flowers.25
- TEUCRIUM.** Labiatae. "Germander." Summer.
753. *Chamaedrys* 12" Pinkish purple blooms.25
- THALICTRUM.** Ranunculaceae. "Meadow Rue." Shade preferred.
754. *Aquilegifolium Purpureum* 36" Columbine leaves; fluffy

	purple blooms in Spring.25
755.	Dipterocarpum 48" Beautiful mauve flowers in large panicles; yellow anthers. A most charming cut. . .	.25 to .50
756.	Glaucum 60" Large glaucous foliage; feathery yellow bloom. Summer.20
757.	Flavum 48" Dainty foliage; very fine yellow blooms. Spring.20
THERMOPSIS. Leguminosae.		
758.	Caroliniana 48" Very long spikes of bright yellow particularly attractive when planted with Delphinium.25
THYMUS. Labiatae. "Thyme."		
759.	Azoricus 2" A very beautiful trailer; bright rosy purple.	.25
760.	Manulata 2" Shiny foliage; large pink flowers.25
761.	Nitidus 8" Semi-shrubby; showy light pink blooms; exceedingly odoriferous.20
762.	Serpyllum 6" Rapid creeper; purple flowers.20
763.	———— Albus 2" Pure white; trailer.20
764.	———— Argenteus 6" Beautiful silvery variegated foliage; very strongly scented; pink flowers.20
765.	———— Carneus 2" Clear light pink.20
766.	———— Citrinedorous Aureus. Golden variegated foliage with a lemon odor.20
767.	———— Coccineus. Light red. 2"20
768.	———— Crimson 2" Very attractive purple crimson.	.20
769.	———— Lanuginosus 2" Woolly Thyme.20
770.	———— Purple; semi-shrubby; purple blooms.20
TRADESCANTIA. Commelinaceae. "Spiderwort."		
771.	Virginica 24" Odd blue flowers for moist situations.	.20
TRITOMA. (Knifofia) Liliaceae. "Redhot Poker." Give slight protection during cold winters.		
772.	Early Express 36" Pokers assorted shades of red and yellow; tropical foliage. Large 2 yr. old only.35
773.	Mirabilis 36" A fine race of early flowering "Pokers" running strongly to yellow shades. 1 yr. plants only. . .	.25
774.	Perpetual Flowering 36" Large spikes mostly in red shades. 2 yr.35
775.	Tuckii, May Queen 36" Interesting new early specie with yellow blooms. 1 yr.35
TROLLIUS. Ranunculaceae. "Globe Flower." Moist soil.		
776.	Europaeus 18" Very charming golden yellow.25
777.	———— Hybrids 24" Varying shades of orange. . .	.30
778.	———— Orange Princess 24" Large deep orange.35
779.	Ledebouri 24" Finest double orange.50
TUNICA. Caryophyllaceae.		
780.	Saxifraga 8" Masses of single light pink blooms in	

midsummer.20
781. ——— Flore-Pleno. Very superior to the above. It has fine foliage and masses of large double pink blooms; very beautiful.35
UROSPERMUM. Genera unknown.	
782. Delchampi. A magnificent rock plant with double golden flowers.25
VALERIANA. (Centranthus) Valerianaceae.	
783. Officinalis 36" The old-fashioned Garden Heliotrope.20
784. Pretty Betsy 18" Assorted red and pink shades. A fine cut.20
785. Rubra 30" Fine showy light red.20
VERBASCUM. Scrophulariaceae. "Mullen."	
786. Phoenicium 24" Very attractive border plant of various shades, including white, pink, salmon, and violet, in graceful spikes.20
VERONICA. Scrophulariaceae. "Speedwell."	
787. Alpina 3" Rapid creeper with very light blue flowers.20
788. Cuppressoides Nana 6" A dainty very tiny semi-glaucous shrub.50
789. Glomerata 15" Glossy foliage; light blue flowers. ..	.20
790. Incana 12" Silvery foliage; spikes of bright blue. ..	.25
791. Lobicae Rosea 1" Creeper with gray foliage; little pink flowers.20
792. Prostrata 6" Early very bright blue.25
793. Rupestris 8" Vivid blue.25
794. Spicata 36" Spikes of clear blue.25
795. ——— Rosea 15" Clear bright pink; excellent for rockery.35
796. Teucrium 15" Royal Blue.25
VINCA. Apocynavceae. "Periwinkle."	
797. Variegata. Fine trailer for window boxes; hanging baskets; or rock gardens.20
VIOLA. Violaceae. "Tufted Pansies."	
798. Alpina. Small flowered dark purple.25
799. Amabile. Lavender.20
800. Antone. Lavender and white.20
801. Apricot Queen.20
802. Arkwright Ruby, bright glowing ruby red.35
803. Ascalon Jewel, a real gem; very early and continuous; large deep lavender blue fading to light lavender blue; thus giving it a two-toned effect. One of the finest. ..	.25
804. Black Knight, a large flowered English variety.20
805. Black Prince, large.20
806. Blue Dandy, very early.20
807. Blue Perfection, exceptionally early and continuous. ..	.20

808. Bosniaca, Rose Queen, tiny bright pink.20
809. Bravo, large blue.20
810. Chrome Yellow.20
811. Cornuta, late blue.20
812. Dark Betty, very late pure dark blue.20
813. Empress, dwarf large flowered lavender.25
814. Enchantress, early pink.25
815. Eureka, dark blue.20
816. Fleur D' or, rich gold.20
817. Golden Giant.20
818. Jersey Gem, the ever popular favorite in pure violet. ..	.20
819. ——— Jewel, darker and larger than J. Gem.20
820. ——— White, tinted lavender.20
812. La Singulare, very odd mauve pink.25
822. Lavender Gem.20
823. Little Gem, a miniature Jersey Gem.20
824. Light Betty, large light blue; very good.20
825. Lord Nelson, deep velvet purple.20
826. Lutea, small golden yellow.20
827. Maggie Mott, very pretty lavender.25
828. Marjorie, large sweet scented blue and white; very showy.25
829. Mary Emma, large clear pure yellow; extra fine.25
830. Mauve Queen, small flowered; late.20
831. Mrs. C. P. Malmo, excellent pure yellow.25
832. Nigra, The Black Imp, tiny black; very cute.25
833. Odorata, Violets.20
834. ——— Blue.20
835. ——— Peacock, blue and white.20
836. ——— White.20
837. ——— Nana Blue, very tiny.25
838. ——— Nana Rose, very tiny.25
839. ——— Double Russian, Violet.25
840. ——— Yellow.25
841. Papilionaceae, The Butterfly Violet, flowers of deep pur- ple are produced in enormous profusion. The robust plant clumps with their rich foliage have considerable beauty even when not in bloom.50
842. Peacock, blue and white; strongly scented of plums.20
843. Pedata, Bird's Foot Violet, foliage resembles a bird's foot. Light blue and white.25
844. Planet, large dark blue.20
845. Portland Gem, early odd blue.20
846. Purple Knight, very large early deep clear purple.25
847. Puck, apricot and purple.20
848. Radio, large light blue.20

849	Rose Queen.20
850.	Ruffled Glory, deep purple.35
851.	Sulphur Glory.20
852.	Sunbeam, small clear golden yellow.20
853.	Superba, blue.20
854.	Wedgewood, deep purple.20
855.	White Gem, large.20
856.	White Queen, small.20
WALLFLOWER. (Cheiranthus) Cruciferae.		
857.	Benary's Dwarf Branching. Very fine assorted shades; early.25
858.	Double tall branching 30" various colors.20
859.	Early Paris 15" Single very early.20
860.	Sutton's Giant Double Dwarf Branching 15" Assorted.35
XEROPHYLLUM. Liliaceae. "Turkey's Beard or Bear Grass."		
861.	Tenax, grassy foliage and huge heads of white bloom. 2½ ft.50 to \$1.00
YUCCA. Liliaceae. "Adam's Needle."		
862.	Aloeifolia Variegata 36" Unusually attractive sword shaped leaves; striped cream.50 to \$1.00
863.	Baccata, Banana Yucca, Long red margined sword shaped leaves, rough concave and with trailing threads. Cream colored flowers in tall panicles; the individual blooms much larger than the common Yucca. The fruits are thick and succulent like short Bananas, sweet and well flavored when ripe. It is said that pies made from them are almost indistinguishable from apple pie. Also eaten out of the hand or the green fruit may be roasted. Give some shelter. Small plants.	\$2.00
864.	Filamentosa, handsome species; huge spikes of cream colored blooms. 1 yr. plants.20
	2 yr. plants35
865.	Glauca Angustifolia 24" Dwarf.35
866.	Whipplei, narrow leaf Yucca.35

GIANT PANSIES

We can offer you these plants from the best strains of seed obtainable, during Spring shipping season only.

867. Separate Colors. STATE COLOR WANTED. Blue, Purple, Blue and white, Orange, White, Pure Yellow, Yellow with dark eye, Black, Apricot, Red-bronze, and many others. 6 for 25c; 45c dozen, \$3.00 per 100
868. Giant Mixed, Every shade imaginable, finest giants. 6 for 25c, 40c dozen; \$2.95 per 100
869. Bellis Perennis Giant English Daisy, double pink. 5c each; 55c dozen; \$3.50 per 100

870. *Bellis Perennis* Giant English Daisy, double red.
 5c each; 55c dozen; \$3.50 per 100
871. *Bellis Perennis* Giant English Daisy, double white.
 5c each; 55c dozen; \$3.50 per 100
872. *Bellis Perennis* Giant English Daisy, Assorted.
 55c dozen; \$3.25 per 100
873. *Myosotis*, Forget-Me-Nots, Blue.
 5c each; 55c dozen; \$3.50 per 100
874. *Myosotis*, Forget-Me-Nots, Pink.
 5c each; 55c dozen; \$3.50 per 100

DELPHINIUM, Van's Exquisite Super Giants

SEED: Taken from plants whose PARENTS have been carefully selected and HAND POLLENIZED for from two to five generations. (To clarify this statement so it will not be misunderstood—this does not mean that this seed is direct result of hand pollenization, but the parents of the selected plants have been hand crossed as stated above.)

This method of careful selection and hand crossing results in a very large percentage of remarkable show Delphiniums. Our test gardens show that you may expect over 75% double or semi-double flowers, instead of the very small percentage obtained from seed where previous generations have been open pollenized in the ordinary way.

Naturally we selected only the very finest of sturdy plants with well formed spikes of good length and with very large well arranged florets. No expense or trouble has been spared to make this the finest strain possible.

WHITE AND OPALESCENT PEARL SHADES: The whites are pure white of good substance, on excellent spikes. Florets measure from 2¼" to 2¾" in diameter. Some are without bees, others with white, yellow, yellow fawn or black bees. Height, 4 to 7 feet.

The opalescent pearl shades are of a soft delicate lilac pearl shade, some tinted white. Seed of these will come mostly true to the parent color but you will get some thrills in other shades from this seed. Only a limited amount of this seed.

875. Packet of about 150 seeds. \$2.00

876 Small seedlings of the above for Spring delivery.

..... 6 for \$1.75; \$3.00 per dozen; \$20.00 per 100

877. Large plants of the above guaranteed true to color and

double \$2.00 to \$5.00 each

PINK SHADES: While these flowers will not be a genuine red pink, you will get some flowers much pinker than the ordinary light mauve and orchid tones. This group has been selected from the best pinks for five generations. Height, 5 to 7 feet. Excellent spikes,

well arranged florets 2¼" to 3" in diameter. Only a limited amount of this seed.

878. Packet of about 150 seeds. \$2.00

879. Small seedlings for Spring delivery. 6 for \$1.75; \$3.00 dozen

880. Large plants. \$4.00 and \$5.00 each

LIGHT SHADES: This group includes the mixed shades in beautiful pastel tones of sky blue, light mauve, delicate lavender and orchid tones. Some Selfs in this mixture. Double and semi-double flowers 2½" to 3" across with various shades of bees and in some cases very double without bees.

881. Packet of about 150 seeds \$1.50

882. Small seedlings for Spring delivery.

..... 6 for \$1.50; 12 for \$2.50; \$15.00 per 100

883. Large plants, full double and semi-double \$1.00 to \$5.00 each

DARK SHADES: In this group are included the brilliant rich blue and purple in varying shades of each color. Some of these purples are tinted fiery red. 2½" to 3" flowers double and semi-double with black, brown and white bees and rarely with the bee absent.

884. Packet of about 150 seeds. \$1.50

885. Small seedlings for Spring delivery.

..... 6 for \$1.50; 12 for \$2.50; \$15.00 per 100

886. Large plants \$1.00 to \$5.00 each

BLUES: We have a limited amount of seed from some blues; which is a color much sought after at the present time. These flowers have not been brought to the same stage of perfection as the others listed in this group being somewhat smaller and producing not quite as high a percentage of doubles and semi-doubles. However, you will get some very beautiful spikes in a wide variety of shades of this lovely color.

890. Packet of about 150 seeds. \$2.00

891. Small seedlings for Spring delivery.

..... 6 for \$1.75; \$3.00 per dozen

No large plants for sale at present.

SEEDS grown and recommended by F. W. Griffiths, a well known nurseryman and Delphinium specialist of this city.

DELPHINIUM, Fancy selected, a very fine strain that will produce fine large flowers with a good percentage double.

892. Double English; seeds saved from fine doubles.

..... 1000 seeds, \$1.00

893. Single English; large flowered. 1000 seeds, .35

894. Double White; saved from double whites. 1000 seeds, \$1.50

895. Single white. 1000 seeds, \$1.00

896. Double German strain. 1000 seeds, .75

897. RHODODENDRON, Cunningham light pink, dwarf.

..... 1500 seeds, \$1.50

898. Hybrids from the best named sorts. 1500 seeds, \$1.50

899. California Assorted. 1500 seeds, .50

COLE'S SHRUB COMPOST

This is something entirely new in Garden Composts and is specially recommended for Rhododendrons. Rhododendrons treated with the new material produce leaves as large as the largest English Laurel leaves with corresponding vigor in growth. While stimulating growth it does not lower the flowering habit, as this is improved too. First made specially for Rhododendrons and other ericaeous plants, it has been found equally effective on all forms of shrub growth.

½ Bushel \$.95 1 Bushel \$1.75

COLE'S SLUGITE

There are a great many slug poisons on the market, but the slugs refuse to eat them when there is more likeable food available. COLE'S SLUGITE does not attempt to poison slugs. It is a stainless, non-poisonous liquid which is sprayed on the plants. Slugs will not come near the plants sprayed with this solution. Double strength, mixed with clay to form a soft putty and then used as a ring around Dahlias, etc., it will prevent slugs coming near them throughout the season.

2 Pounds \$.50

COLE'S LAWN WEEDKILLER

This is a combination of Chemicals so carefully blended that it will kill all lawn weeds without injuring the grasses. Pearlwort, chickweed and other troublesome lawn pests, especially moss, are instantly killed by this weedkiller while the intermingling grasses are stimulated and improved.

2 Pounds \$.40

COLE'S GARDENERS' SOAP

Unlike the usual mechanics' hand soap, this is not a mixture of stock yard wastes and lye, but is composed entirely from Vegetable Oils. It will instantly clean the roughest hands and make them soft. Being composed of saponified vegetable oils entirely it does not injure the tenderest skin. \$.50

COLE'S LAWN COMPOST

This is something new in the way of grass treatment. It is bacterially treated vegetable matter which gives lasting results on the lawn. It produces a rich, full turf, does not burn, and as it contains no mineral compounds it leaves no injurious residues in the soil. One light dressing a season will maintain a rich deep green turf. Owing to its bacterial content its action is slow and continuous and is not thus lost with the first cutting as with so many grass foods, which give up all their food as

soon as applied, with a consequent loss of much of it before the plant needs it.

1/2 Bushel \$.95 1 Bushel \$1.75

COLE'S FUNGICIDE

This Fungicide will not stain either the plant or paint. There are many effective Fungicides for mildew, etc., but most of them either burn or stain and are thus ruled out except in commercial practice, such as orchard spraying. COLE'S FUNGICIDE kills and prevents most forms of fungi which attack plants, from the microscopic damping off fungus in the seed flats to the mildew on Roses. It will prevent rusts on Snaps and Hollyhocks. It will kill and prevent the mealy mildews on Delphiniums, Phlox, Lupines, etc. The destructive brown spot on creeping bent lawns is easily controlled by COLE'S FUNGICIDE.

1/2 Pint \$.65 1 Pint \$.90

COLE'S PLANT STIMULANT

This is purely a stimulant and cannot take the place of fertilizer. It is a most effective way to "buck up" plants that are slow to move into growth, especially seedlings in the spring. All pot plants show an immediate response when used at the rate of a tablespoon to the gallon of water.

1/2 Pint \$.60 1 Pint \$.90

COLE'S PLANT COMPOST

Almost without exception the "plant foods" have either a Sulphate of Ammonia or Nitrate of Soda as a base for their Nitrogen content. This renders them very liable to cause burning, and both ingredients leave objectionable plant poisons as residue in the soil. COLE'S PLANT COMPOST does not burn or leave a poisonous residue. The plant foods are combined with specially prepared carbons which have the power of conserving the Ammonia as it is formed. Ammonia not used by the plants at once is absorbed by the carbons and held until they need it. Each grain of this special carbon is capable of instantly absorbing several hundred times its own volume of Ammonia and holding it in readiness for the plant's use.

1/2 Bushel \$.95 1 Bushel \$1.75

COLE'S APHISIDE

Undoubtedly the most effective Aphisides are made from Nicotine, but they are deadly poison and as such cannot be safely used on plants that are to be eaten. The poison is also readily absorbed through the skin when spraying. Effective non-poisonous aphisides are made from various extracts of Pyrethrum flowers,

but these have the disadvantage of being unstable as they are readily decomposed on being exposed to light. COLE'S APHISIDE is a non-poisonous spray which does not contain the unstable pyrethrum extract as its active matter, it is made entirely from plant oils and is neither affected by heat nor light. Used at the ratio of two tablespoons to the gallon of water it quickly destroys most forms of sucking insects and plant mites. Being made entirely from emulsified vegetable oils, it spreads on the most glaucous surfaces; even cabbage leaves will wet instantly.

1/2 Pint \$.65 1 Pint \$.90

COLITE

This is an effective spray for Rose Aphis, Bean Aphis, Cabbage Aphis, Apple Aphis, White Fly, Thrip Mites and Red Spider. 1 tsp. of Colite to a gallon of water. Cypress Worm, Tent Caterpillar, Willow Worm, Poplar Worm, Rose Worm, Currant Worm, Pear and Hawthorne Worm. A perfect vermin wash for dogs.

2 oz. Jar \$.45 4 oz. Jar \$.75

SLUGSTOP

Slugite mixed with clay so that it can be placed around the plant.
3 Pound Bag \$.50
